

**Capstone Project Request : Entry # 184****Client Organization Name:**

Parents and Friends of Children and Adults, Inc. DBA Home for Healing

**Client Contact**

Kristin Trulock

**Client Email:**

[director@homeforhealing.org](mailto:director@homeforhealing.org)

**Client Phone:**

(150) 197-8290

**Organization Description/Mission/Purpose:**

The Home for Healing (formerly the Family Home) offers support to parents of NICU babies and individuals and their caregivers undergoing cancer treatment by providing convenient and affordable lodging in a peaceful and restorative environment.

**Description of the problem or need:**

We are a local non-profit that houses cancer patients and parents of babies in the NICU that are underinsured or uninsured and in financial need. We are a very small staff of two with little to no experience in website design and database needs. We do not have the funding to hire a firm to help us with our website and database. When I came on board in September of 2020 there was no prior database with donors or guests. It could be a HUGE help if we had this information to refer to for grants and donations. Plus, our website needs A LOT of help to make us look the very best we can! Right now we have a board member "willing" to do the upkeep of our website that has no prior experience.

Lastly, we need a "business center" for all of our guests to use while staying here. They need a way to pay their bills, view their "my chart" accounts for appointments, and keep up with their families. We have the computers, but don't have the knowledge to set them up properly.

We are located very close to UALR across the entrance to UAMS off Markham. We have plenty of space for social distancing while working together.

**Description of deliverable requested: (E.g. website, database)**

We would love website help, creating a database, and setting up our business center.

**List any current implementations of deliverable (URLs, etc.):**
